

of Central Yavapai County north of Prescott Valley and west of Chino Valley along Williamson Valley Road.

In the northeast region of the study area, a casino (Four Corners area) is being proposed, as well as a resort (Monument Valley area) and a resort catering to boaters (Page). Also, the "Gateway to Hopi Land" hotel and travel center is being proposed as a 72-acre complex at the junction of SR-264 and US 60 near Tuba City.

2.4 EXISTING ROADWAY SYSTEM

This section documents information related to the existing roadway system within the study area. Major roadways serving the three Focus Areas were analyzed under existing conditions in addition to the roadway functional classification; bridges and infrastructure; and railroad grade crossings (Figure 2-9a-c).

Highway Performance Monitoring System (HPMS) dataset (2005) was used to obtain roadway attributes such as annual average daily traffic (AADT), number of lanes, posted speed limit and designated truck route. Designated truck routes are reported per "Federal Regulatory Authority" to determine whether a roadway section is on or off a truck way. Trucks are permitted on any roadway unless otherwise designated. State, County and municipal roadway characteristics are described below.
